- Java
- Node
- Express
- Git
- GitHub
- MongoDB
- TypeScript

INTERESTS

- Producing and designing graphics, logos and websites for collaborative and personal projects
- Reading novels and creative writing science-fiction, fantasy and thriller genres

EXPERIENCE

Lead Developer – Self Employed
November 2022 – Present
Substantially enriched my full-stack skills by planning, building and releasing multiple enterprise-grade applications, including: an instant messenger; a logistics managing appplication; and an online clothing store.
Utilised industry standards – such as developing in Scrum sprints, managing version control, and composing comprehensive documentation – to accomplish the completion of these high-quality projects.
Enhanced my development knowledge by self-teaching and rigorously exercising highly sought-after industry skills.

Tech Specialist – QA ltd.
July 2022 – November 2022
Galvanised a cohesive and supportive team of developers of mixed abilities. Consistently provided one-to-one verbal and technical support to other team members, capacitating a constructive working environment.

Student Trainee - QA Digital Academy Bootcamp
January 2022 – March 2022
Led several development projects to upskill and build upon my existing software development skills. Successfully completed all tasks presented in the course with confidence and efficiency.

Care Assistant – Bluebird Care
July 2020 – September 2022
Consistently provided high-quality service to fulfil a wide range of clients' requirements. Greatly developed team-working and communication skills to meet the high standard expected of clients.

Managing Director – Cloudburst Media
May 2019 – March 2020
United and mobilised a team of volunteer writers and editors by conducting interviews and resume reviews. Developed a platform for young writers from scratch using WordPress and managed and moderated it on a daily basis.
